PROFESSIONAL SUMMARY

Passionate full-stack developer with hands-on experience building dynamic, responsive web applications using the MERN stack. Adept at solving real-world problems through clean, efficient code and always eager to learn the newest technologies.

TECHNICAL SKILLS

Languages and Framework: JavaScript, Python, HTML, CSS / SASS, React.js, DOM manipulation, AJAX, Async JS

Skills and Concepts : Node.js, Express.js, REST APIs, Mongoose, CRUD Operations, User Authentication

Databases : MongoDB

Analytics and Tools : GIT, Github, VS Code, Postman, Netlify, Figma

EXPERIENCE

The Institute –precision camshaft ltd, Solapur, Maharashtra, india

dec'16 to march'22

Roll – Quality Control Inspector

- Ensured that all products met customer requirements
- Ensured compliance with safety regulations by monitoring workers during the manufacturing process

PROJECTS

1) Food Recipe App(MERN Stack)

Live Demo : <https://food-recipe-swapnil.netlify.app>

- Built a full-stack web application where users can browse, search, create, update, and delete food recipes.
- Implemented secure user authentication and authorization using bcrypt for password hashing and JWT (JSON Web Tokens) for session management.
- Designed a RESTful API using Express.js and Node.js, and integrated with MongoDB using Mongoose for data modeling.
- Created a dynamic and responsive frontend using React.js with React Router and Axios for API communication.
- Deployed the app using e Render for backend and Netlify for frontend.

Key Technologies : React.js, Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt, REST API, Axios, React Router, Netlify

2) AI-Powered Text-to-Image Generator (MERN Stack)

Live Demo : <https://ai-imagify-swapnil.netlify.app>

Tech Stack: MongoDB, Express.js, React.js, Node.js (MERN), Tailwind CSS, ClipDrop API, JWT, Stripe API, Framer Motion

- Building a full-stack AI SaaS application that converts text prompts into AI-generated images using the **ClipDrop API**.
- Implemented secure user authentication using **JWT**, storing user data in **MongoDB**.
- Developed a **credit-based system** that tracks and limits image generations; users can purchase more credits via **Stripe payment integration**.
- Designed a modern, responsive UI using **React** and **Tailwind CSS**, with interactive **animations using Framer Motion**.

Key Features :

- User registration and login with JWT-based auth, AI-driven text-to-image generation (ClipDrop API), Credit system with Stripe integration for payments, Responsive design with animations (Framer Motion), Backend APIs built with Express & Node.js

3) Quiz App (MERN Stack)

Live Demo : <https://quize-app-swapnil.netlify.app/>

- Built a full-stack quiz application where users can register, log in, and attempt multiple-choice questions (MCQs).
- Implemented secure user authentication using bcrypt for password hashing and JWT (JSON Web Tokens) for token-based session handling.
- Developed a RESTful API using Node.js and Express, and connected to **MongoDB** Atlas using Mongoose for data modeling and storage.
- Deployed the frontend on Netlify and the backend on Render, ensuring seamless communication via API endpoints.

Key Technologies : React.js, Node.js, Express, MongoDB, Mongoose, JWT, bcrypt, REST API, Tailwind CSS, React Router, Netlify, Render

4) Weather App

Live Demo : <https://weather-app-swapnil.netlify.app/>

- Built a responsive weather application that fetches real-time weather data from a public API (API-OpenWeatherMap) based on user input.
- Implemented dynamic routing and error handling using React Router, including a custom “404 City Not Found” page when invalid city names are searched.
- Displayed temperature, humidity, weather conditions, and icons using API data in an intuitive UI.
- Optimized user experience with input validation,

Key Technologies: React.js, React Router, Weather API, Axios, HTML, Tailwind, JavaScript

6) Portfolio Website (HTML,CSS,Javascript)

Live Demo : <https://swapnil-portfolio-site.netlify.app/>

- Developed a personal portfolio website to showcase projects, skills, and education details.
- Integrated links to live project demos and GitHub repositories.
- Organized content into clear sections such as About, Projects, Skills, Contact, and Resume.

Education and Training

School - Shri S K Birajdar Prashala Shelgi Solapur – Shelgi, Solapur

Diploma in Automobile Engineering

MSBTE (Maharashtra State Board of Technical Education) – Solapur

Completed: 2016

Developed strong fundamentals in mechanical engineering and technical problem-solving.

-----TRAINING-----

Full Stack Web Development

Skilliance Institute — Completed [November, 2025]

Covered MERN Stack (MongoDB, Express.js, React.js, Node.js)

- Learned front-end (HTML, CSS, JavaScript, React) and back-end (Node.js, Express) development
- Built multiple full-stack projects and deployed applications
- Successfully completed project deployments using modern development practices

ACHIEVEMENTS AND CERTIFICATIONS

- **Software developer Certificate (TestDome)**
- **Certified bt MERN stack developer by skilliance institute**
